

## Supply Chain Management

Natural Resources  
Europe and West Africa

# How to do business with us

AMEC is a leading international provider of total life of asset services to clients in the upstream oil and gas industry.

Our main business lines are asset support (brownfield engineering, operations and maintenance, duty-holding) and asset development (brownfield/greenfield engineering and project management).

We are headquartered in Aberdeen with major offices in London and Great Yarmouth along with smaller offices based in Amsterdam, The Netherlands, Lagos (Nigeria) and Darlington.

# Who to

Supply Chain Manager  
Various FEEDs  
vic.delasalle@amec.com

## Our supply chain management policies

We are an original signatory to the Oil and Gas Industry Supply Chain Code of Practice. We are also a strong supporter of FPAL and an advocate for their role in our industry. We have a long standing commitment to undertake two-way performance feedback with our sources of supply and you will see us regularly participating at various Share Fairs.

## Becoming an AMEC supplier

We require all existing and prospective suppliers and contractors to be fully registered on FPAL, with up-to-date information available for our use and where applicable a capability profile. We naturally prefer to deal with parties that have secured a consistent level of high quality FPAL feedback from their customers. AMEC also requires companies to be ISO 9001/29001 certified and have the required accreditations for their products and services.

We expect our chosen sources to deliver on their promises, be safe, take care of the environment, value our business, be ethical and fair, fully participate in our projects to the best of their ability and provide us with an important element of preferential treatment.

## Being a great customer

We have a high degree of reliance on our suppliers and contractors in assisting us to satisfy the demands of our customers.

As a consequence we recognise the necessity of consistently being a great customer to our own supply chain. We have developed and implemented a 12-step programme to help us achieve our aims of being a first class customer (contact our Supply Chain Managers for further details).

## Forward Plans

Our supply chain management activities are of course largely dependent upon the projects we deliver at any one time. We typically spend around \$3.5bn globally on goods and services each year.

Our spend intentions can be obtained at Share Fairs we support and by contacting our Supply Chain Managers.

AMEC (LSE: AMEC) is a focused supplier of consultancy, engineering and project management services to its customers in the world's oil and gas, minerals and metals, clean energy, environment and infrastructure markets. With annual revenues of around £3 billion, AMEC designs, delivers and maintains strategic and complex assets and employs some 27,000 people in around 40 countries worldwide.
