Asia Pacific Factory Assessment System Overview

AP FAS address the physical validation (on-site) of evidence regarding a supplier's capability, competence and compliance within agreed parameters. The audit and assessment services are a natural extension to the assurance process - the existing supply chain management services (APUG SMS) provided by Achilles.

Have you been asked to demonstrate your company's Quality Assurance?

“Over 30 utilities and more than 35 of their contracting partners use the UK audit system to qualify their supply chain, through a standard assessment of their management systems and site performance. This can lead to a significant reduction in the time and effort required to pre-qualify for contracts.”

Colin Maund, CEO of Achilles Group

A factory assessment or an audit is a formal inspection that is long established as a reliable method of validating the current status of an organisation. Procurement and Compliance teams need to be able to manage their risk when procuring services from suppliers, and knowing that suppliers they use on a regular basis have been independently audited, providing them with a greater level of assurance.

Promoting excellence in Safety, Health, Environment and Quality

“CLP Power are committed to continually improving the management of health & safety, environment and corporate social responsibility. Factory Assessments are considered to be one of the corner stones in establishing the competencies of our suppliers and contractors. As Founding Members to APUG, we see supplier factory assessments as vital.”

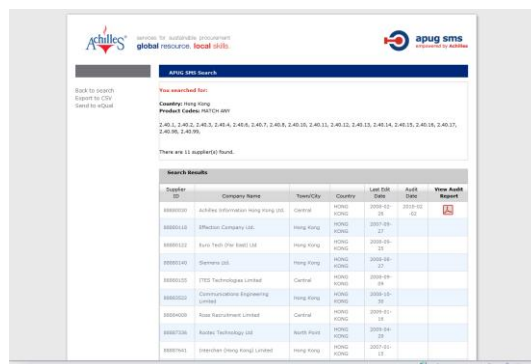

SM Ho, Chief Procurement Officer of CLP Power Hong Kong

AP FAS is focused on Safety, Health, Environment and Quality (SHEQ) assessments and by registering on AP FAS, suppliers and contractors will gain a clear understanding of the industry's requirements. The assessments generate detailed reports of the company's capabilities that may be used both as an aid to sourcing for the Utilities but also as valuable guidance on improvements for the company being assessed.

AP FAS on APUG Supplier Management System

The AP FAS will be integrated with the APUG SMS (Supplier Management System) which is accessed everyday by 25 leading Asia Pacific utility companies. The audit protocols are developed jointly with the APUG committee to ensure it fits the needs of all the utility companies in Asia Pacific, and worldwide.

AP FAS reports

Who should join?

Buyers who want to

- Ensure supplier's capabilities with trusted 3rd-party verification
- Obtain information on supplier's SHEQ and Corporate Responsibility issues
- Further expand sourcing network of quality suppliers who have been audited
- Assess supplier capabilities on an on-going basis

Suppliers who want to

- Demonstrate to buyers their compliance to Safety, Health, Environment & Quality (SHEQ) requirements
- Minimize duplication of costs on audits by using a common standard
- Seek professional advice on ways to further improve company operation to meet buyer needs
- Be listed on a trusted audit system to be sourced among utilities in Asia Pacific and across the globe

Call now to schedule your Factory Assessment!

Contact Achilles today to schedule an audit for your factory. Our representatives will go through your business needs and propose an audit plan for you.

"Following our initial contact, Achilles responded quickly in organizing both office and site audit. We were pleased that whilst the audits were thorough, the auditor did adopt a pragmatic approach when considering our actions in the context of our business. Achilles have continued to provide prompt responses to support calls following registration."

Alaister Gemmill, Engineer Manager of Purac Ltd, UK

Asia Pacific Utilities Group (APUG)

Collectively, the APUG utility members have an annual spend in excess of US\$10 billion. Representing 25 Utilities from 8 countries, and over 350 individual buyers, APUG offers a support network of likeminded professionals involved in utility procurement. It is a non-profit making, low cost entity, with APUG's operations fully funded from membership fees.

APUG's operations are part of a Global Network of 180 utilities and over 16,000 suppliers to the industry worldwide. Bringing together seven regional utility groups supported by **Achilles Information**, buyers and suppliers are able to access the worldwide utility market.

APUG Supplier Management System (APUG SMS)

APUG SMS is the central supplier management system used by buyers from the Asia Pacific Utilities Group to source and select suppliers and contractors for upcoming tenders and projects. Suppliers register their company information on the online system. This information is then accessible to each buyer from all of the APUG members.

APUG SMS makes suppliers more visible and avoids duplication of information by centralizing the collection, validation and availability of supplier information. Ultimately, it reduces the costs and time for both buyers and suppliers.
